GitHub: github.com/hemanth26-web | Hugging Face: huggingface.co/Hemanth26Kumar

PROFESSIONAL SUMMARY

B.Tech Computer Science student and full-stack developer with hands-on experience building MERN applications and Generative AI systems. Skilled in React, Node.js, Express, MongoDB, Python, FastAPI, LangChain, and RAG pipelines. Built and deployed end-to-end products including e-commerce, telemedicine, and AI document-processing platforms. Currently completing a Generative AI internship and seeking a full-time Software Developer or AI Engineer role.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, Kotlin, SQL, HTML5, CSS3

Frontend: React.js, Redux, Tailwind CSS, Bootstrap, Responsive Web Design

Backend: Node.js, Express.js, FastAPI, REST APIs, WebSockets, Socket.io, JWT Authentication

Databases: MongoDB, MySQL, SQLite, AstraDB, Vector Databases

AI / Machine Learning: Generative AI, LangChain, RAG, Prompt Engineering, LLM Tool Calling, OpenAI API, Google Gemini API, Ollama, Hugging Face Transformers, scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, OpenCV

Tools & Platforms: Git, GitHub, VS Code, Postman, Streamlit, Hugging Face Spaces, Streamlit Cloud, Cloudinary, Razorpay, Stripe, Playwright

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Agile Development

EXPERIENCE

Generative AI Intern — Guruvai Sciences (via TuteDude) Remote | 2025 - Present

- Completed 39+ hands-on Generative AI assignments covering Python fundamentals, machine learning, LangChain, RAG, and LLM application development.
- Built and deployed a production GenAI chat application to both Streamlit Cloud and Hugging Face Spaces, handling environment configuration, dependency conflicts, and deployment debugging.
- Developed a Retrieval-Augmented Generation system using AstraDB as the vector store with Hugging Face embeddings and LangChain document loaders and text splitters.
- Implemented a CodeLlama-based coding assistant and an Ollama chatbot instrumented with LangSmith for tracing and evaluation.
- Applied scikit-learn pipelines for data preprocessing, feature engineering, and classification model training on structured datasets.

Freelance Web Developer Hyderabad, India | 2025

- Designed and delivered a responsive clinic website for Sri Laxmi Venkateshwara Medical & Clinic, covering requirements gathering, development, and client handover.
- Optimized page structure and mobile responsiveness to improve local discoverability and patient enquiries.

PROJECTS

Nova — AI Voice Assistant (Python, FastAPI, Gemini API, Kotlin)

- Built a JARVIS-style personal voice assistant for Windows with speech-to-text via faster-whisper, text-to-speech, and Gemini-powered LLM tool calling.
- Implemented automation tools for launching applications, file explorer access, web search, WhatsApp, and system commands through structured function calling.
- Developed NovaMobile, a companion Android app in Kotlin using SpeechRecognizer and TextToSpeech for voice-driven dialing, app launching, and search.

Rx Scan — AI Medical Prescription Reader (Gemini Vision, FastAPI, OpenCV, React)

- Built an AI system that extracts structured medicine details from handwritten prescription images using Gemini 2.5 Flash Vision.
- Applied OpenCV preprocessing to improve image clarity and extraction accuracy before model inference.
- Exposed the pipeline through a FastAPI backend consumed by a React frontend for real-time results.

MediConnect — Telemedicine Platform (MERN, Socket.io, WebRTC)

- Developed a full-stack telemedicine platform with role-based access control for patients, doctors, and administrators.

- Integrated Socket.io real-time chat and WebRTC video-call signaling for live doctor consultations.
- Implemented Razorpay and Stripe payment flows and Cloudinary-based media uploads for medical records.

ShopNex — E-Commerce Platform (MERN, Razorpay)

- Built a full-stack e-commerce application with product catalog, cart, order management, and JWT-based authentication.
- Integrated Razorpay payment gateway and resolved schema, environment, and deployment issues during development.

SoundWave — Music Streaming Platform (Node.js, Express, MongoDB)

- Developed a music streaming web application with audio playback, playlist management, and a REST API backend.
- Debugged and resolved cross-origin resource sharing issues between frontend and backend environments.

AI Resume Analyzer (Python, Streamlit, Gemini API)

- Created a tool that parses resumes and generates AI-driven feedback on skills, keyword coverage, and role fit.

EDUCATION

Bachelor of Technology, Computer Science and Engineering 2024 - 2028
Chaitanya Deemed to be University, Hyderabad, Telangana

CERTIFICATIONS

- Generative AI Internship Program — TuteDude / Guruvai Sciences
- Microsoft Business Analytics Certification
- Infosys Springboard — Technical Certifications
- SoloLearn — Programming Certifications
- be10X — AI Tools Workshop
- Skill Dhuniya — Technical Certification
